light is our profession

A detailed view of the ANTARES Mirror Mount, a complex mechanical assembly. It features a large, flat, rectangular mirror mounted on a multi-axis gimbal. The mirror is held in place by a central support structure. The entire assembly is mounted on a base with several adjustment screws. The background is a soft, out-of-focus white.

ANTARES Mirror Mounts: The Bright *Solution for Your Large-Sized Optics*

- Gimbal design.
- For large optics according to customer demand.
- Adjustment by 170 TPI fine thread screws (standard).
- Available with piezo drive.
- Suitable for high vacuum applications.
- **Typical application:** Beam steering in compressor chambers of ultrahigh power laser systems.
